A question has arisen as to why [redacted] appears on a page of the intra-office memorandum from Philadelphia captioned, "New Left Notes - Philadelphia," dated 9/16/70 which was stolen from the Media Resident Agency. SAC Joe D. Jamieson of the Philadelphia Office advised on 4/16/71 that [redacted] was a resident agent at the Media Resident Agency at the time the above-mentioned intra-office memorandum was routed to the resident agency. SAC Jamieson further stated that his name was written at the bottom of the first page of this memorandum simply for routing purposes since he handled matters set forth in the memorandum. When SAC Jamieson was called on 4/16/71 he contacted SA [redacted], the Supervisor in the Philadelphia Office who wrote the memorandum and [redacted] stated that he did not personally route this memorandum to [redacted] since this was not his handwriting. SA [redacted] thought that his secretary, [redacted] probably routed it to [redacted] by writing his name on the bottom. [redacted] was on leave for the entire day at the time SAC Jamieson contacted SA [redacted]. She will be contacted on Monday, 4/19/71, concerning this matter when she returns to duty.

It should be noted that with the closing of the Media Resident Agency, SA [redacted] will be working directly out of the Philadelphia Office commencing 4/19/71. A letter dated 4/16/71 is being directed to him transferring him from Media to Philadelphia. He was censured by letter 3/18/71 in connection with the theft at the Media Resident Agency for his failure to provide proper security for serials charged to him and he was also placed on probation. The intra-office memorandum referred to above was one of the serials involved where proper security was not afforded.

RECOMMENDATION:

None. For information.

During investigation at the Princeton, New Jersey, Post Office, concerning copies of surface documents in the MEDBURG case, which were mailed from Princeton, New Jersey. Postal employees were alerted to bring to our attention the mailing of any envelopes similar to those used in surfacing documents.

On 4/13/71, Postal Official called this office and advised that he had a bundle of mail with handprinting, many of which contained the dinosaur stamp, known to have been used in other mailings. He made these letters available. They were photographed.

Enclosed for the Bureau are seven photographs of these letters. The Laboratory is requested to compare the handprinting in these photographs with pertinent documents in the MEDBURG case.

GENERAL INVESTIGATIVE DIVISION

Attached indicates publication of FBI documents directly attributed to RESIST, a national peace organization in Cambridge, Massachusetts. The "Harvard Crimson" issue of March 26, 1971, made mention of the fact that RESIST had received stolen documents from the Citizens Commission to Investigate the FBI. We are checking with Boston to determine the specific identity of these documents, and the Internal Security Division of the Department is being advised. U

Specimens received

4/7/71

Request examination of the envelopes and copies referred to in Butel 4/3/71 to determine the following: U

Could the typewriting be IBM Prestige Elite style of type U

Was it made on a manual, electric, or portable typewriter U

Was a fabric or a carbon ribbon used U

Result of examination:

The typewriter impressions on Q100 through Q111 are Royal Merit Elite style of type and not IBM Prestige Elite. U

A fabric ribbon was used in the preparation of the typewriter impressions on the envelopes, Q100, Q102, Q104, Q106, Q108, and Q110. It is not possible to determine the model of the Royal elite typewriter used in the preparation of Q100 through Q111 since Merit Elite style of type is used on the electric, standard and, on special purchase, the portable typewriter, also. The type of ribbon used to prepare the typewriter impressions on Q101, Q103, Q105, Q107, Q109, and Q111 cannot be determined from the copies submitted. U
